Hazardous Materials Preliminary Reconnaissance Summary

TO: File

COPIES: Dan Dupies/CH2M HILL

FROM: Kathi Ried/CH2M HILL

DATE: July 17, 2007

PROJECT NUMBER: 334832.WR.EN

Introduction

Preliminary hazardous materials reconnaissance activities have been completed for the Wisconsin Rapids East Arterial project (ID# 6999-08-09), located in Wood County, Wisconsin. The following activities were completed:

- Windshield survey of the proposed corridor
- Meeting with representatives from WisDOT, the Village of Port Edwards, and Domtar
- Conference call with Wisconsin Department of Natural Resources (WDNR)
- Conference call with local historian
- Review of aerial photographs from Domtar Island and environmental database findings for the project corridor as completed by Environmental Data Resources, Inc (EDR). Domtar Island is located within the Wisconsin River near the southwest study terminus and the proposed corridor crosses the island (see attached figure).

This technical memorandum presents a summary of the findings along with recommendations.

Windshield Survey

Existing segments of the proposed alignment from E. Riverview Expressway south to Griffith Street, east to County Road Z, crossing the Wisconsin River and connecting to State Trunk Highway 54 were driven on February 8, 2007. At the time of the windshield survey, very little snow was present on the ground. Items identified during the windshield survey included:

- an active above ground storage tank (AST) present at the south side of the fire station along State Highway 54 in Port Edwards. No visual signs of release or leakage were observed (Attachment A).
- an apparent private well located in the southwest corner of Griffith Avenue and 8th Street.

COPYRIGHT 2008 BY CH2M HILL, INC. • COMPANY CONFIDENTIAL

- a white, AST behind the Goodyear dealership north of Griffith Avenue on the west side of 8th Street
- numerous gasoline stations and automotive service/repair businesses along 8th Street between Griffith Avenue and the Riverview Expressway (Attachment A).
- the location of approximately 18 drums and an apparent well associated with the Blanchard's RV Sales on the east side of 8th Street north of Dove (Attachment A).
- the location of approximately 12 drums at the Advanced Fiberglass Technologies at the northwest corner of Pepper Avenue and 16th Street (Attachment A).

Domtar Meeting

On February 8, 2007, CH2M HILL met with representatives from WisDOT, the Village of Port Edwards, and Domtar to discuss historical and current operations on the island. Although project alternatives have not been developed, one or more alternatives are anticipated to cross Domtar Island. Dan Cummins from Domtar provided aerial photographs and indicated that historically spent liquor from the paper process was disposed in ponds on the island. He indicated that pipelines were present to transport liquids from the plant to the ponds. He also indicated that a possible village dump may have been located on the island. Railroads could be seen on the aerial photographs and it was indicated that they were used to bring in wood for the mill. According to Dan Cummins, no known bulk chemicals were stored on the island. He indicated that buildings are present on the north end of the island that are used to store dam supplies. Power is extended to the north end of the island.

WDNR Conference Call

On February 15, 2007, CH2M HILL held a conference call with Tom Hvizdak and Mike Miller from WDNR to discuss known, regulated environmental activities at Domtar Island. A summary of the items discussed included:

- WDNR has no record of a licensed solid waste disposal facility for the island. WDNR indicated that the solid waste program did not start until 1970.
- WDNR's records for solid waste facilities in the area of the project include the Old Grand Rapids landfill. It is located to the east of the project approximately south of Airport Avenue between 28th and 32nd Streets.
- Based on WDNR's experience with similar paper making operations, they indicted black liquor might be a potential waste from the facility. Black liquor was described as the waste left over after dissolving liquids and tannins. Black liquor contains sodium hydroxide. WDNR indicated that they would not expect VOCs or metals from the operations, but possibly a few polycyclic aromatic hydrocarbons (PAHs). WDNR indicated that the black liquor would not be considered hazardous waste.
- WDNR recommends WisDOT acquire the property on the island needed for the project as a permanent easement.
- WDNR indicated a lot of old gas stations are present along 8th Street that may require management and special handling if subsurface activities are performed for the project. A possible historical gas station may have been located at the southeast corner of Griffith and 8th Street.
- WDNR indicated numerous investigation activities have been completed at SFGP Inc. The findings of these investigations indicate contamination is not migrating.

COPYRIGHT 2008 BY CH2M HILL, INC. • COMPANY CONFIDENTIAL

- WDNR indicated that a fairly new compost site was located at the southeast corner of E. Riverview Expressway and State Highway 54.
- WDNR indicated that the Walmart store on 8th Street was built in the area of an old salvage yard.
- WDNR indicated that bedrock in the area is generally encountered approximately 10 feet below grade on the west side of the river and 30-40 feet below grade on the east side of the river.
- WDNR provided several documents (Attachment B) including documentation for filling in the liquor lagoons and a copy of the Wood County soil survey map that indicates "dumps and other similar non soil areas" located along the southwest, west central and southeast portion of the island.

Local Historian Conference Call

On April 26, 2007, Marshall Buehler, a local historian, was contacted regarding the history of the island owned by Domtar (715-887-3966). Marshall indicated that he has lived in the area for 80 years, played on the island owned by Domtar as a child, and worked at the facility prior to Domtar's purchase. A summary of the conversation included:

- Buildings were located at the northern end of the island to support dam activities. The buildings included a garage, office building and storage building. He indicated that there was a fuel oil tank by the office building. He was not aware of the presence of USTs or septic tanks.
- The island was used historically to store logs. Several railroad spurs were present on the island to bring in logs.
- Initially the waste liquor was sent directly to the river. In the 1950's the waste liquor was sent to ponds on the island. In the 1970's the waste liquor was used for energy recovery.
- He indicated several waste sulfite liquor ponds were present on the island from the central to southern portion of the east side of the island. He indicated that a pipeline from the mill transferred liquor to the ponds.
- The liquors consisted of magnesium bisulfide and sulforuos acid.
- The "horseshoe" shaped pond in the east central portion of the island was used as a municipal landfill in the mid 1960's.
- Fill was placed on the northeast end of the island consisting of rocks, bricks and wood.
- By 1978, there was not a lot of activity on the island. Alum unloading occurs at the south end of the island.

EDR Results

EDR performed a search of state and federal databases for the project and provided aerial photographs from 1938-1992 for Domtar island. Results from the database search are summarized in Table 1 and included in Attachment C. In general, the search indicates multiple historic/existing aboveground (AST) and underground storage (UST) tanks in the vicinity of the project corridor. In addition, the search indicates several locations of leaking AST (LAST) and UST (LUST) or other response action required for the tank sites. In addition to the tank sites, the following sites were identified by EDR as being under WDNR cleanup activities and include SFGP and Walmart. The EDR report has several records

COPYRIGHT 2008 BY CH2M HILL, INC. • COMPANY CONFIDENTIAL

referencing waste disposal sites/landfills for Domtar/Nekoosa Edwards Paper Company. WDNR indicated that they have no records of waste disposal or landfill activities for the facility at Wisconsin River, and they believed these are the related to the facility further downstream.

Aerial photographs received from EDR for the corridor range from 1938 until 1992 (Attachment C). The photographs are the same as those brought by Domtar to the meeting on February 8, 2007. As indicated previously, the following was observed in the photos:

- Railroad spurs on the central and southern portion of the island owned by Domtar
- Buildings on the northern portion of the island
- Dark features on the eastern central and southern portion of the islands. These features were described by the historian as the waste liquor ponds.

Summary and Conclusions

Based on the data sources reviewed and interviews completed, potential environmental impacts to subsurface media may be present on the island owned by Domtar, as well as at several former or existing gasoline stations located within or immediately adjacent to the proposed corridor. Once additional design information is available (planned excavation and acquisition), additional hazardous material activities (Phase 1 and/or 2) are recommended to further evaluate potential hazardous materials concerns.

general file

Gentlemen:

Subject: Nekoosa Edwards Paper Company, Inc.
Port Edwards, Wisconsin
Waste Sulfite Liquor Ponds

The Enforcement Division of the Department of Natural Resources and Nekoosa Edwards have jointly arrived at a solution to the problem of the above-ground seepage of waste sulfite liquor from the old authorized lagoons on the island. The ponds will be pumped out, and the waste liquor will be disposed of through a licensed outfall at a controlled rate.

These ponds, which are no longer used, were a Department of Natural Resources-approved method of waste sulfite liquor disposal. The liquor would travel through the soil prior to entering the river, thus obtaining some BOD removal. Due to the acid spent sulfite liquor, the ground is fairly well saturated with slightly acid material. We would like to fill the ponds with material, then cover them with dirt, seed them with grass, and plant trees on them. This would return the area to its natural state.

2

We propose using waste magnesium oxide inerts from our recovery process as fill material. Copies of material analysis are attached. The initial leachate would be alkaline and would neutralize the existing soil. The material would be used only to fill the existing ponds.

(715) 887-5111 • PORT EDWARDS • WISCONSIN 54469
A GREAT NORTHERN NEKOOSA COMPANY

We feel this is a logical approach to eliminate the lagoons plus dispose of some solid waste material.

If you have any questions, please contact me.

Sincerely,

Philip R Campbell

Mr. Phil Campbell
Nekoosa Edwards Paper Company, Inc.
Port Edwards, Wisconsin 54469

Dear Phil:

This is in response to your letter of July 31, 1975, regarding filling in the waste sulfite liquor ponds. As discussed at our August 26, 1975, meeting in Port Edwards, the project appears feasible, although additional information is needed from you to allow the Department to make a full assessment. Please provide three copies of the following information to this office, along with a $75 plan review fee:

1. A map or aerial photograph of the area of sufficient scale showing the boundaries of the lagoons relative to surface water, homes, wells, rock outcroppings, drainage courses, floodplains and other important features within one-quarter mile.

2. A drawing or plot plan of the lagoons showing their length, width, and depth.

3. A brief account of how, when, and where any liquid will be pumped out of the lagoons.

4. A drawing showing the filling sequence of the lagoons. Include filling schedules on this drawing.

5. A description of the waste types and volumes to be used for filling purposes. Include sources and an assessment of their dependability. If enough waste is not available to fill the lagoons, a discussion of the source, type, and quantity of additional earth fill should be included.

6. A narrative discussing operating procedures, equipment to be used, persons responsible for the operation, surface drainage control, and other considerations to be observed during the project.

7. A narrative regarding the abandonment procedures at the site. This section should indicate the type, source and quantity of cover material. Two feet of earth are needed along with six inches of topsoil. The site must be graded and seeded for vegetation.

Very truly yours,

David A. Martin
Solid Waste Management Coordinator

FEDERAL RECORDS

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/13/2006 has revealed that there is 1 RCRA-LQG site within the searched area.

STATE AND LOCAL RECORDS

BRRTS: BRRTS is a tracking system of contaminated sites. It holds key information for finding out more about a site or an activity. Activity types included are: Abandoned Container - An abandoned container with potentially hazardous contents recovered from a site. No discharge to the environment occurs. If the container did release a hazardous substance, a spill would be associated with the site. Superfund - is a federal program created by Congress in 1980 to finance cleanup of the nation's worst hazardous waste sites. VPLE - Voluntary Property Liability Exemptions apply to sites in which a property owner conducts an environmental investigation and cleanup of an entire property and then receives limits on their future liability. General Property - Environmental actions which apply to the property as a whole, rather than a specific source of contamination, such as the LUST or environmental repair site. Examples would be off-site letters, municipal liability clarification letters, lease letters, voluntary party liability exemption actions, and general liability clarification letters

A review of the BRRTS list, as provided by EDR, and dated 09/30/2006 has revealed that there are 3 BRRTS sites within the searched area.

SFGP, INC.\INDUSTRIAL PLASTICS	***2330 16TH ST S***	***1***	***3***
GEORGIA PACIFIC TRUCK REPAIR	***100 WISCONSIN RIVER DR***	***15***	***266***

BROWNFIELDS: A listing of brownfields sites included in the BRRTS database. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

A review of the BROWNFIELDS list, as provided by EDR, and dated 09/30/2006 has revealed that there is 1 BROWNFIELDS site within the searched area.

Site	Address	Map ID	Page
SFGP, INC.\INDUSTRIAL PLASTICS	***2330 16TH ST S***	***1***	***3***

AIRS: A listing of permits issued by the Air Permit Program.

A review of the AIRS list, as provided by EDR, and dated 04/13/2006 has revealed that there is 1 AIRS site within the searched area.

Site	Address	Map ID	Page
DOMTAR AW CORP ASH BARK SITE	***PARTS GOVT LOTS 4 / 5***	***12***	***53***

SHWIMS: Information on sites, and facilities operating at sites, that are regulated by the Waste Management program

A review of the SHWIMS list, as provided by EDR, and dated 10/27/2006 has revealed that there are 7 SHWIMS sites within the searched area.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

Action Desc: Closure using soil performance standards in place of RCLs for soil. Deed restrictions and/or maintenance may be needed. Public notice required to be posted by RP.Date a deed restriction is recorded at the Register of Deeds office for a property. Extent of soil contamination is known but impracticable to remove now or an engineering control is required to be maintained or NR720 industrial stds are applied.Date of letter to RP notifying of legal responsibilities associated with the discovery of contamination.Date the DNR approves the Interim Action Workplan.Date the DNR is notified of the discovery of the contamination.Date the DNR receives the Interim Action Workplan. Details the actions to be taken to contain or stabilize the contamination, includes a temporary engineering control. Workplan must include an SI schedule.Date the DNR receives the Site Investigation Report. Provides information regarding activities performed to determine degree & extent of contamination and forming a basis for choosing the appropriate remedial action.Date the DNR receives the report documenting the proposed construction of the remedial system. For fee paying sites only.Date the closure review request is received and a fee paid for DNR review.Date the site closure was approved, but the site will not be formally closed until receipt of documentation of abandonment of wells, disposal of soil, recording of deed instruments , etc.Restricts property use or requires future actions.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of

DOMTAR AW CORP PORT EDWARDS (Continued) **1000340023**

total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FRP

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

RACT/BACT/LAER Clearinghouse (RBLC) data base contains case-specific information on the 'Best Available' air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). This information has been provided by State and local permitting agencies. The Clearinghouse also contains a regulation data base that summarizes EPA emission limits required in New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAP), and Maximum Achievable Control Technology (MACT) standards.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

Action Name:	Closure Review Request Received with Fee		

Action Desc: A site previously closed with a deed attachment has provided information to the Department showing that the reason(s) for the deed filing no longer is present. A subsequent deed filing has been recorded to indicate this.Date a deed restriction is recorded at the Register of Deeds office for a property. Extent of soil contamination is known but impracticable to remove now or an engineering control is required to be maintained or NR720 industrial stds are applied.Date and status that this site had QAQC completed for GIS registryDate of letter to RP notifying of legal responsibilities associated with the discovery of contamination.Date the Closure Letter or No Further Action letter is sent. NOTE: This is the ONLY action code that will close an activity.Date the DNR is notified of the discovery of the contamination.Date the closure review request is received and a fee paid for DNR review.Date the site closure was approved, but the site will not be formally closed until receipt of documentation of abandonment of wells, disposal of soil, recording of deed instruments , etc.Date updates on progress are received. Can be 30, 60, 90 days or other interval.Miscellaneous action. Please see action comments.Upon completing final closure conditions, this case will be placed on the GIS Registry with groundwater contamination exceeding the NR140 Enforcement Standard and/or soil contamination above the NR720 RCL.Restricts property use or requires future actions.

Action Desc: DNR received an environmental assessment of a petroleum tank system at the time of tank closure or change in service.Date a deed restriction is recorded at the Register of Deeds office for a property. Extent of soil contamination is known but impracticable to remove now or an engineering control is required to be maintained or NR720 industrial stds are applied.Date and status that this site had QAQC completed for GIS registryDate of letter to RP notifying of legal responsibilities associated with the discovery of contamination.Date the Closure Letter or No Further Action letter is sent. NOTE: This is the ONLY action code that will close an activity.Date the DNR allows the RP to proceed without approval of the SIWP. Either written or by phone call.Date the DNR is notified of the discovery of the contamination.Date the DNR receives the Remedial Action Report detailing remedial action efforts for an activity.Date the DNR receives the Site Investigation Report. Provides information regarding activities performed to determine degree & extent of contamination and forming a basis for choosing the appropriate remedial action.Date the DNR receives the Site Investigation Workplan. States the objectives of the investigation to determine the degree and extent of contamination.Date the Site Investigation Workplan is approved verbally or in writing by DNR staff. For state-lead sites and sites the RR Supervisor has designated to be project-managed.Date the closure review request is received and a fee paid for DNR review.Date the site closure was approved, but the site will not be formally closed until receipt of documentation of abandonment of wells, disposal of soil, recording of deed instruments , etc.Date updates on progress are received. Can be 30, 60, 90 days or other interval.Miscellaneous action. Please see action comments.Upon completing final closure conditions, this case will be placed on the GIS Registry with groundwater contamination exceeding the NR140 Enforcement Standard and/or soil contamination above the NR720 RCL.Restricts property use or requires future actions.

Action Desc: DNR received an environmental assessment of a petroleum tank system at the time of tank closure or change in service.Date deed affidavit is recorded at the Register of Deeds office for a property noting contamination still exists and is inaccessible or not completely defined and would pose a direct contact risk if made accessible. Does not require further work byDate of letter to RP notifying of legal responsibilities associated with the discovery of contamination.Date the Closure Letter or No Further Action letter is sent. NOTE: This is the ONLY action code that will close an activity.Date the DNR is notified of the discovery of the contamination.Date the DNR receives the Remedial Action Options Report (workplan). Includes actions to prevent, minimize, stabilize, eliminate threat of discharged hazardous substances, restore the environment to the extent practicable. Identify and evaluate opDate the DNR receives the Remedial Action Report detailing remedial action efforts for an activity.Date the DNR receives the Site Investigation Report. Provides information regarding activities performed to determine degree & extent of contamination and forming a basis for choosing the appropriate remedial action.Date the DNR receives the Site Investigation Workplan. States the objectives of the investigation to determine the degree and extent of contamination.Date the DNR sends a letter notifying RP that the site has been

GEORGIA PACIFIC TRUCK REPAIR (Continued) **S101513231**

closed with site specific conditions described. For example, soil contamination may exist but if dug up, it would not pose a direct contact threat.Date the Department of Commerce transfers project management of the activity back to the DNR.Date the Site Investigation Report is approved by DNR staff.Date the Site Investigation Workplan is approved verbally or in writing by DNR staff. For state-lead sites and sites the RR Supervisor has designated to be project-managed.Date the closure review request is received for DNR review and no fee was paid.Date the site closure was approved, but the site will not be formally closed until receipt of documentation of abandonment of wells, disposal of soil, recording of deed instruments , etc.Date updates on progress are received. Can be 30, 60, 90 days or other interval.Miscellaneous action. Please see action comments.Oversight of medium or low risk petroleum cleanup has been transferred to the Wisconsin Department of Commerce.Variance granted under NR 140 to close the site with groundwater contamination above the preventive action limit (PAL).the RP. Recorded by the property owner.tions consistent with DNR standards.

Other Pertinent Environmental Activity Identified at Site

SDWIS [WS] (Safe Drinking Water Information System (Water System)). Water Systems can have one or more water system facilities. The water system will purchase water from several facilities. Drinking water information is stored in EPA's SDWIS, which contains information about public water systems and their violations of EPA's regulations for safe drinking water. These statutes and accompanying regulations establish maximum contaminant levels (MCL), treatment techniques, and monitoring and reporting requirements to ensure that water provided to customers is safe for human consumption.

PORT EDWARDS SERVICES BLDG (Continued) **1007215340**

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL RECOVERY: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 08/09/2006
Date Data Arrived at EDR: 09/21/2006

Next Scheduled EDR Contact: 03/19/2007
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

RCRA: Resource Conservation and Recovery Act Information

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

STATE AND LOCAL RECORDS

SHWS: Hazard Ranking List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

BRRTS: Bureau of Remediation & Redevelopment Tracking System

BRRTS is a tracking system of contaminated sites. It holds key information for finding out more about a site or an activity. Activity types included are: Abandoned Container - An abandoned container with potentially hazardous contents recovered from a site. No discharge to the environment occurs. If the container did release a hazardous substance, a spill would be associated with the site. Superfund - is a federal program created by Congress in 1980 to finance cleanup of the nation's worst hazardous waste sites. VPLE - Voluntary Property Liability Exemptions apply to sites in which a property owner conducts an environmental investigation and cleanup of an entire property and then receives limits on their future liability. General Property - Environmental actions which apply to the property as a whole, rather than a specific source of contamination, such as the LUST or environmental repair site. Examples would be off-site letters, municipal liability clarification letters, lease letters, voluntary party liability exemption actions, and general liability clarification letters.

AGSPILLS: Agricultural Spill Cases

Spills reported to the Department of Agriculture, Trade & Consumer Protection. There are two types of spills. Long-term: These are mainly pesticide and fertilizer cases. Some might include other contaminants at the same site. Some might involve wood-treaters - which use pesticides. All of them involve spills of products, but these spills generally result from day to day use (chronic spills) rather than accidental spills (acute). Accidental: These are the acute spills of pesticides and fertilizers and only involve pesticides and fertilizers. Most of these are cleaned up and closed within 3 to 6 months.

Date of Government Version: 09/13/2006
Date Data Arrived at EDR: 09/15/2006

CRS: Closed Remediation Sites

A Closed Remediation Site is parcel of land at which the groundwater has become contaminated and which is affected by a particular type of legal restriction. Specifically, certain steps have been taken to stabilize/remediate the contamination, and the state is satisfied that no further efforts are necessary provided that the property is not used for certain purposes.

DRYCLEANERS: Five Star Recognition Program Sites

Drycleaning facilities enrolled in the Five Star Recognition Program. The primary focus of the Five Star program is to encourage reductions in the use and emissions of perchloroethylene (perc), a common but potentially hazardous drycleaning solvent. Participating cleaners pursue recycling opportunities, spill prevention strategies, more efficient solvent use, and more wet cleaning to reduce their perc consumption.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.
