Wisconsin Rapids, WI 54495-8095**

ORDER DEADLINE IS JANUARY 15, 2010 Some varieties may be in short supply & substitutions may be necessary, therefore, **PLEASE ORDER EARLY!**

2010 Tree Sale Descriptions

Elderberry (Shrub) 10-12 feet mature height. White flowers produce small purple berries. Excellent summer wildlife food and cover especially for songbirds. Fruit is edible by humans (used for wines and jellies). Broad tolerance to sun and shade, soil types and moisture conditions, prefers moist sites. Recommended spacing is 4-6 feet.

Ninebark (Shrub) 5-9 feet in height having an upright spreading nature with recurved branches. It has large clusters of white flowers in the summer with reddish seedpods in fall. Ninebark will grow in moist to dry sites. It prefers well-drained soil and is resistant to drought. Recommended spacing is 6-8 feet.

Silky Dogwood (Shrub) up to 8 foot mature height. Silky Dogwood is a very hardy native shrub. Will grow well in moist to well drained soils in sun or shade. Has white flowers and blue berries. Recommended spacing is 6-8 feet.

Black Cherry (Tree) 50-60 feet mature height. The dark green leaves turn yellow to red in fall and white flowers, which bloom in spring. It's an important food source for many songbirds, black bear and deer. Fruit is edible by humans (used for wine and jelly). It will tolerate full to partial sun and moist to dry conditions. Recommended spacing is 15-20 feet.

Douglas Fir (Tree) 50-100 feet mature height. It prefers well drained soils. Provides much needed winter cover for wildlife. Its needles are light green to blue-green about 1 inch with 2-3 inch cones.

Hackberry (Tree) 75-100 feet mature height. It grows in a variety of moist to dry soils. Hackberry can tolerate high pH. Produces purple/brown berries that are preferred by robins, yellow-bellied sapsuckers and cedar waxwings. Recommended spacing is 10-15 feet.

Red Maple (Tree) 75-80 feet mature height. It's one of the fastest growing of all the hardwood maple species. Produces winged seeds in the spring. Its 2 1/2- 4 inch dull green leaves turn a brilliant red, orange or yellow in the fall. Red Maples will tolerate most soils with full to partial sun.

Tamarack (Tree) 30-60 feet mature height. The needles are bright green in spring, soft and flexible, turning golden in the fall just before falling to the ground for winter. Grows best in moist soils, near marshes and swamps. Often found near black spruce, balsam fir and northern white cedar. Recommended spacing is 5-10 feet.

White Pine (Tree) 50-100 feet mature height. Needles are 3-5 inches long occurring in bundles of 5. Frequent nest site of numerous species of birds. White Pine is ideal for wildlife cover due to its rapid growth. Grows on sandy soils and rocky ridges, but prefers fertile well-drained soils. Recommended spacing is 10-15 feet.

White Spruce (Tree) 50 –100 feet mature height. Provides nesting, roosting and winter cover to a variety of wildlife species; also, good for windbreaks. Will grow in full sun to partial shade and moist to dry soils. Recommended spacing is 10-15 feet.

SPECIAL ITEMS

GENERIC GEL: Generic gel is a starch absorbent that retains water and gives it back to the plant during dry periods. The gel increases plant survivability. It comes in granular form and is mixed with water. Roots are dipped into the solution prior to planting.

<u>SIZE</u>	<u># Seedlings treated</u>	<u># Transplants treated</u>	<u>Cost</u>
4 oz.	1,000	250	\$ 6.50 + tax
1 lb.	4,000	1000	\$11.50 + tax
3 lb.	12,000	3000	\$21.50 + tax

TREE SHELTERS: Tree shelters are 4-foot plastic, seamless, twin-walled tubes. They protect newly planted seedlings from wildlife damage. They produce a greenhouse environment, resulting in high survival rates and faster growth.

Cost of tree shelters - \$2.61 ea. + tax

OTHER INFORMATION

Prices may vary if we do not meet minimum order requirements for each species. We will notify you if this is the case. When the trees and shrubs arrive, we will notify you when and where to pick them up. Distribution normally takes place the second or third week of April.
