How to Determine Pool License Complexity Category

Check all statements that apply

The complexity category is needed to complete your license application. **A separate license is required for each basin.** Note that information about features of your public pool and water attraction establishment is necessary for your application.

The categories (simple/with features, moderate/with features, and complex/with features) use a point system to determine the license complexity category. Use the checklist below to calculate your license complexity category.

Check all that apply:

- The pool contains a basin (1 point)
- The pool type is a whirlpool or therapy pool (1 point)
- The recirculation system is designated to a single pool basin (1 point)
- The recirculation system is designated to multiple basins (0.5 point)
- The basin is greater than 1,999 square feet in area (1 point)
- The pool is defined as a water attraction (1 point)
- The pool has features (1 point)

“Basin” means any vessel constructed of manmade materials designed to hold or receive water, including the splash zone of an interactive play attraction or a run-out slide.

“Therapy pool” means a pool used for professionally administered physical therapy.

“Water attraction” means a pool with design and operational features that provide a patron recreational activity other than conventional swimming that involves partial or total immersion of the body, including an activity pool, interactive play attraction, leisure river, plunge pool, vortex pool, vanishing edge pool, waterslide, run-out slide, drop slide, pool slide, wave pool, zero-depth entry pool, and any public pool with features except wading pools.

“Whirlpool” means a small pool, sometimes called a “spa”, which uses higher temperature water than other pools and may include a water agitation system.

Does your pool have a Feature? **Yes** **No**

“Feature” means a pool with a depth greater than 16 feet, a pool with a surface area greater than 20,000 sq. ft., or a physical object permanently installed in a pool that is intended for recreational use, including a pool slide, waterslide, pad walk, basketball hoop, diving board, wave generator, treadmill, vortex pool, climbing wall, current pool, swim-up bar, vanishing edge pool, tethered or non-tethered floatable, or a spray feature.
